

OPTIMUM IDOL™

BEHIND THE DESIGN:

With the overwhelming success and popularity around the globe of the original IDOL™, we felt it was important to take those original components and spin them forward with our latest advancements in coverstock and outer core technology.

OUTSIDE - you will find our latest version of our often imitated, never duplicated, MicroTrax™ Solid Reactive coverstock. This version is our latest "fully loaded" nanoparticle material that creates plenty of traction without losing any responsiveness down lane where it is cherished the most.

INSIDE - you will find the forever famous Ikon™ weightblock shape from the original IDOL Series wrapped with A.I. Core Technology, thus creating stronger overall core dynamics as well as more overall energy dispersement as it travels through the pins.
