

**PITCH BLACK™**

### **A Storm in Your Control:**

Storm bowling balls are coveted for many reasons including premium performance, stunning appearance, and the utmost quality. Professionals around the globe rely on Storm on daily basis. The proof is in the pudding!

And while many look to Storm to cut through oil and create maximum entry angle, not every situation requires maximum ball motion. In fact, shorter oil patterns and drier conditions can be as equally challenging as a lane with oil right up to the head pin!

Enter Pitch Black. It's a glimpse back in time that showcases a super-high quality conventional urethane with proven design principles for both the coverstock and weight block.

### **Obtainable Consistency:**

With nearly 25 years of experience manufacturing high performance balls, Storm is the bowlers company. Storm knows what you need, and we are here to help. We are here to help you conquer all types of lane conditions, ranging from the deepest seas of heavy oil to the dry lake beds of the Sahara desert.

Speaking of bowling in the desert, the **Pitch Black™** is sure to satisfy even the thirstiest camel. Storm looked back to proven technology of yesterday and developed a new spin on it with the porous and predictable new **Controll™** solid urethane coverstock. It's durable, consistent, and just what you need on rough, wood lanes and shorter oil patterns. It's midlane roll with tons of control!

The **Capacitor™ Core** helps regulate your flare potential, making you the ultimate master of your ball motion. Higher rev players and those with slower speeds are going to love this shape as it is a true-rolling masterpiece...pure predictability at its finest.
