

Marvel™ Pearl versus Phaze™ II

DOPLAR™ Test

Marvel™ Pearl
 R2X™ Pearl Reactive
 1500-grit Polished
 Centripetal™ Core

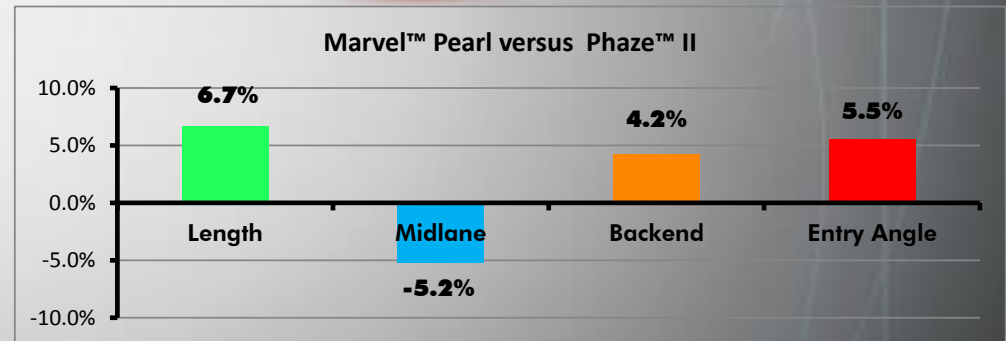

→ **Marvel™ Pearl**
 Laydown: 21.92
 Launch Angle: -2.50°
 Break Point: 42.62'
 Impact Point: 17.44

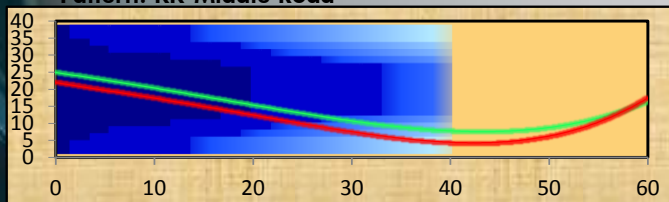

Phaze™ II
 TX-16™ Solid Reactive
 3000-grit Abralon®
 Velocity™ Core

→ **Phaze™ II**
 Laydown: 24.90
 Launch Angle: -2.50°
 Break Point: 43.25'
 Impact Point: 16.42

- The Marvel Pearl laydown is about 7 boards outside of the Phaze II.
- The Marvel Pearl gave more overall backend and entry angle.
- The Phaze II produced about 5% more midlane read.
- Both balls created a smooth overall motion.
