DARIAN JACKSON: THIRTEEN YEAR OLD STORM BOWLING PRODIGY

I know that I am the next Storm bowling prodigy because I am good at bowling and I know how to have fun with my teammates even if I'm having a bad day. I know that the main purpose of bowling is not to make a hall of fame (although that would be cool) but it is to have fun and to just do your best.

Even though I have never bowled a three- hundred I know I am the Storm prodigy because I have bowled a 219 when I was 12 years old. That wasn't even my highest game. My highest game was a 245 that I bowled on Saturday 7/17/2010. I know that to the professionals that my high games are not that impressive. I know what you're saying "right now" that's what I get when I'm having a bad day". But to me those games make me so proud of myself. I also am very proud to say that I have bowled in three tournaments (two PEPSI, and one city tournament). I would also like to include classified team wins. My team and I have always placed in every season we have ever bowled. Plus I have received awards for high games scratch, handicapped, and high scratch series. I have also won one hundred dollars in scholarship money.

Also I know and am certain that I am the Storm prodigy because I can adjust to any lane conditions that happen to cross my path. I also got my first six- bagger.

Now it's time to be hypocritical. I know I was bragging and I don't think that that was right. My grandpa always told me to smile and have fun even if my ball wasn't curving enough or if it was curving too much. Most of the essays that you will read they will say that they think they are the next prodigy because they have bowled a three- hundred or because they have the highest average in their league. Well don't be fooled by their awesome games.

I also know that I am the next Storm bowling prodigy because I love bowling. I know that people will say that oh I'm love bowling the most. But I'm here to tell you a fact nobody loves bowling more than me. I live to bowl, bowling is my life. The first time I ever went bowling was when I was about five years old with my uncle and my two aunts. I got my

first strike without bumpers and ever since that moment I have loved bowling. I have been bowling in a league ever since I was six (I'm thirteen now).

I want to tell you what I want to do in my future. I would like to help little kids and teenagers with their bowling. I want to help them realize that it's ok to not hit your average and to tell them that the main reason to bowl is to have fun

Finally I know that I would be a great bowler if I had some Storm products. I know that you're thinking "why would she bring this up, that makes her essay a little weak because she told us she doesn't even use the product". Well it's because I have witnessed the best of the Storm products at work. Most everybody in my grandpas Friday night league at my house Cal Bowl uses some kind of Storm ball and the way it rolls is just breathtaking. They have wonderful games and I wish that I could bowl like that and have consistent great games. Well anyways that is why I know that I am the Storm Prodigy of 2010.
