

THE NEXT PRODIGY

SHARON RYAN

I would have to say with the selection of Storm equipment that is available right now it is easy to become the next Prodigy. I have only been bowling with Storm equipment for the past three years and I am very glad that I made the move over to your company. I felt so passionate about your company and your equipment that I applied for a spot on your amateur staff. I was disappointed to find out no spots were available this year. But that has not stopped me from bowling as if I had been chosen. Since that time I have bowled Internationally in Thailand and in Malaysia placing First in both of those tournaments to represent Storm very well. I also have bowled in Las Vegas placing third and locally in our Masters tournament taking another First Place here as well. I am always having people come up to me asking me what balls I am using. I always highly recommend Storm to them.

I believe that I will be your next Prodigy because of the dedication and hunger for the game that I have. I have worked very hard both on and off the lanes to better myself and my game which I believe my performance has shown. With my continued development of my game, which I will be working with the staff at the Kegel training center on, demonstrates that I could be an asset to your company. As well as working on my game I assist the bowling center coaching the youth bowlers. I feel that this helps to bring a different and fresh perspective to my game as well as to promote the sport to the next generation of bowlers. Just as the meaning of Prodigy – anything so extraordinary as to excite, wonder or an astonishment a marvel, as a prodigy of learning. I see the excitement they have when they do well and I have a humbled feeling that I had some part of helping them to achieve that.

I feel that the legacy of the next Prodigy should be able to help your company advance to new and untouched territories. The ideas I have would be adventurous such as holding a promotion on a Cruise ship such as the new NCI Epic that has two bowling alleys on it. We could hold seminars on board touching different areas of bowling just like the different bowling clinics. They would be able

to enjoy the cruise and have the seminars on the sea days and have the ability for practice time with the Pro bowlers. Another idea I had was that Storm could have a Youth tournament so that our very talented youth bowlers could be able to should themselves for College or University scouts and also have a chance at winning scholarship money to help them with their college dreams. We need to expose the sport of bowling to all different age groups and levels and to promote it In a positive way; to allow everyone a chance to dream to become a Prodigy.....
