

# DARK CODE™

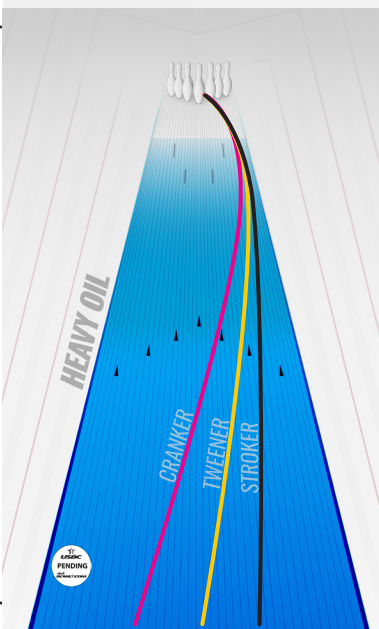

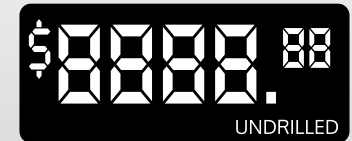

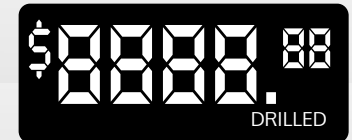

**SMELL ME! CHERRY DELIGHT**

Traditionally, the term “hybrid” suggests that both solid and pearl components coexist within a coverstock. We saw a better way for hybrids and took it. When we joined R2S™ with NeX™ in the lab, the results exceeded our expectations. Thus, ReX a.k.a. “Reactor Extreme” was born. If you need the perfect combination of mid-lane roll and backend reactivity with head-turn pin carry, the Dark Code should be your very first choice.
