

EXOTIC GEM™

BEHIND THE DESIGN:

Given the overwhelming success of the original GEM™ by bowlers of all skill levels around the globe, we felt it was important to make the next installment in this series something uniquely special like the first one. Lets just say it didn't take long for us to figure out that MicroTrax™ Pearl was the key element to this beauty.

So we went to work dialing in the proper ratios for each of the chemical elements to compliment the nanoparticles blended throughout the entire coverstock. This was the most crucial factor in making sure this pearl ball would conquer those Medium/Heavy Oil conditions.

Bottom line, the EXOTIC GEM will produce skid through the front of the lane while still digging into the midlane where the Defiant LRG will take over and produce the strongest continuation of any high-end asymmetric pearl ball on the market today!
