\$ 8888.88
DRILLED

\$ 8888.88
UNDRILLED

CORE:

Ikon™ Core – Now forever famous thanks to the original IDOL™ and most recently in the IDOL™ Helios, this low RG, high differential symmetrical core generates plenty of flare and change of direction.

COVERSTOCK:

XtremeTrax™ Pearl Reactive – Just like the original solid version, the pearl version also features “chemically charged” nano-particles which create more traction in oil than our eTrax™ Pearl or eTrax™ PLUS Pearl covers, making this the most aggressive overall pearl coverstock in our product line today.

Factory Finish: 4000-grit Abralon

ENGINEERED FOR:

Medium Oil - Medium/Heavy Oil Conditions

Available Weights: 16lbs – 12lbs
