

Axiom versus Phaze II

DOPLAR™ TEST

Axiom
NeX™ Solid Reactive
3000-grit Abralon®
Orbital™ Core

Axiom
Laydown: 30.79
Launch Angle: -3.60°
Break Point: 43.65'
Impact Point: 19.29

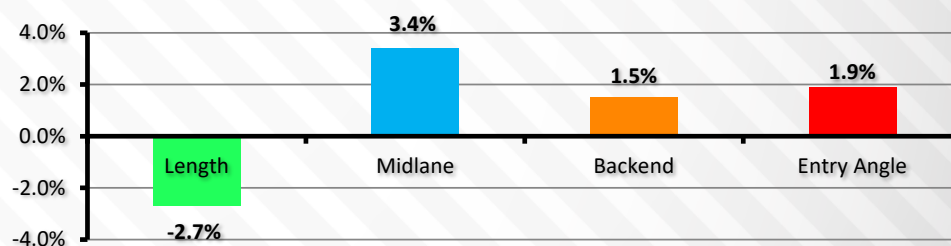

Phaze II
TX-16™ Solid Reactive
3000-grit Abralon®
Velocity™ Core

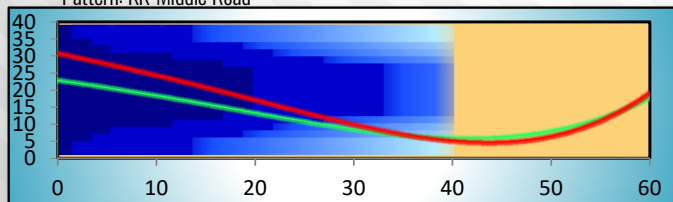

Phaze II
Laydown: 22.80
Launch Angle: -2.50°
Break Point: 41.60'
Impact Point: 17.94

Axiom™ versus Phaze™ II

- The Axiom was the go-to choice on heavy patterns.
- The Orbital Core revs up very fast visually.
- TX-16 is a great step down as the lanes began to transition.
- NeX technology is Storm's earliest reading cover to date.

Pattern: KK-Middle Road

Tester: Chad McLean
Delivery: Right Hand Cranker
Rev Rate: 480 RPM
Rotation: 45°
Tilt: 6°
