

CODE X™

GAME IMPROVED

Since 1985, we have continually redefined the bowling landscape by bringing to market the most innovative and forward thinking products. We provide industry leading technology in bowling products that elevate the game of every individual both on and off the lanes. The Code X represents an epic shift in how the core and cover behave to enhance power, spearheaded by our innovative RAD4 technology and R2S Solid coverstock.

FORMIDABLE FORCE

Radial Accelerating Disk™ (RAD) technology was unveiled in the original X-Factor™ series as the first to feature dual density disc technology. The Code franchise has since become the ultimate weapon providing easy access to power and flare potential ideal for the modern game. Any bowler, from scratch players to high handicappers, should find midlane read, hook potential, and control with the all-new Code X.

With an intermediate differential that's higher than any other ball in its line, the intuitive RAD4 Core provides pro shop professionals more fine-tuning possibilities for bowlers of all styles. The higher the undrilled intermediate differential is, the more significant the placement of the PSA becomes. The Code X's highly dynamic weight block allows for a forceful move towards the pocket and towering pin carry.

At over 10% more midlane read than the Code Red, R2S Solid is a chassis that favors heavy oil. It's a perfect marriage between cover and core machined to precise specifications to achieve optimal performance no matter the condition you throw at it.

This is technology, not mythology. This is innovation, not imitation. This is all smoke and no mirrors. Storm, "The Bowler's Company™", is your future for bowling.

TECHNICAL DATA

COVERSTOCK

R2S™ Solid Reactive

WEIGHT BLOCK

RAD4™ Core

FACTORY FINISH

3000-grit Abralon®
