

# Incite versus Axiom

## DOPLAR™ TEST

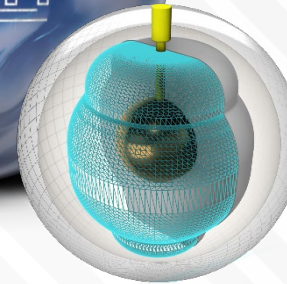

**Incite**  
R4S™ Hybrid Reactive  
3000-grit Abralon®  
Tensor™ Core

→ **Incite**  
Laydown: 22.81  
Launch Angle: -2.80°  
Break Point: 41.68'  
Impact Point: 18.20

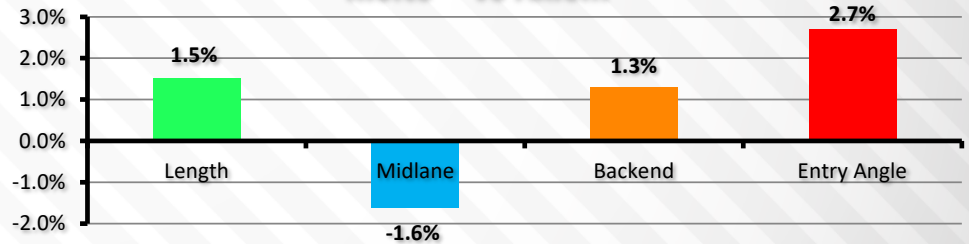

**Axiom**  
NeX™ Solid Reactive  
3000-grit Abralon®  
Orbital™ Core

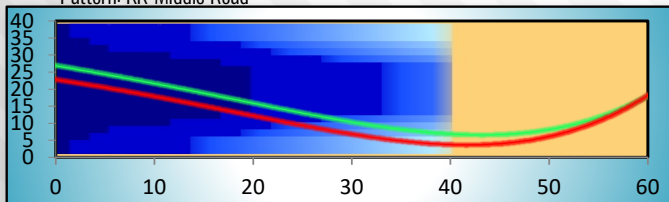

→ **Axiom**  
Laydown: 26.85  
Launch Angle: -2.90°  
Break Point: 43.13'  
Impact Point: 18.00

- The Incite bridges the gap between Premier™ Line and Master™ Line performance.
- The Axiom was the go-to choice on heavy oil patterns.
- R4S Hybrid blends out over/under conditions extremely well.
- The Tensor Core's innovative asymmetric design created a motion similar to a symmetric ball with a flare-increasing balance hole.

### Incite™ vs Axiom™

Pattern: KK-Middle Road

Tester: Steve Kloempken  
Delivery: Right Hand Tweener  
Rev Rate: 315 RPM  
Rotation: 65°  
Tilt: 13°
