

# MATCH UP™ BLACK PEARL

## INTENSIFY YOUR GAME

On the surface, bowling is a pretty simple game! The pins aren't moving. You can stand and aim wherever you want, each and every shot. Knock over ten pins time and again and go home with the trophy! But let's be honest: it's not quite that easy. You need to have the right ball at the right time. You have to match up properly if you want to win. If you don't, you'll be exiting early with your head hung low.

## EXCEEDING EXPECTATIONS

In the modern era of bowling, it's all about matching up. Matching your game up with the right piece of equipment and the proper layout is critical to winning tournaments. Lane conditions change rapidly, so you better be prepared. It's why you need a true arsenal. And we have you covered from top to bottom.

The Stinger 2.0 Core has been providing bowlers with some amped-up technology at an affordable price point. And yes, they look as good as they roll. With the all-new Match Up Black Pearl, we have adjusted the surface to better handle more oil in most environments. At 2000-grit Abralon, this is the first Match Up with a sanded surface. Reactor Pearl gives clean length, but still blends out the pattern with its matte finish. The proven Reactor coverstock formula wraps this core and, together, it creates a worry-free path to the pocket. The Match Up – because matching up is essential to winning, and winning NEVER GETS OLD.

Storm – We are “The Bowler’s Company™”
