

MATCH UP™

INTENSIFY YOUR GAME

On the surface, bowling is a pretty simple game! The pins aren't moving. You can stand and aim wherever you want, each and every shot. Knock over ten pins time and again and go home with the trophy! But let's be honest; it's not quite that easy. You need to have the right ball at the right time. You have to match up properly if you want to win. If you don't, you'll be exiting early with your head hung low.

EXCEEDING EXPECTATIONS

In the modern era of bowling, it's all about matching up. Matching your game up with the right piece of equipment and the proper layout is critical to winning tournaments. Lane conditions change rapidly so you better be prepared. It's why you need a true arsenal, and we have you covered from top to bottom.

You'll find some killer, new weight block technology in the new Match Ups. The Stinger™ 2.0 Core offers more flare potential and hook than the original version featured in the Match. This added power allows you to get more entry angle and better pin carry when you need it.

The proven Reactor coverstock formula wraps this new core and, together, it creates a worry-free path to the pocket. The Match Up – because matching up is essential to winning.
