

DOPLAR™ TEST

Nova versus Dark Code

Nova
R2X™ Hybrid Reactive
3000-grit Abralon®
Ignition™ Core

→ **Nova**
Laydown: 27.42
Launch Angle: -3.10°
Break Point: 43.76'
Impact Point: 16.84

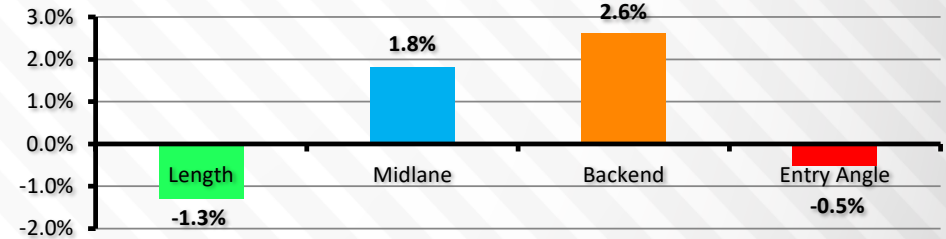

Dark Code
ReX™ Pearl Reactive
1500-grit Polished
RAD4™ Core

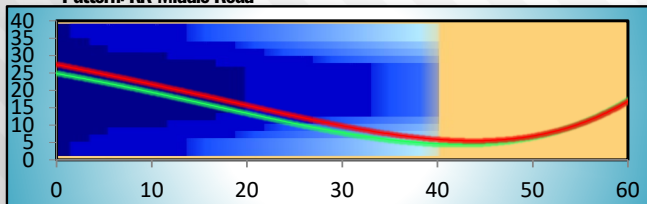

→ **Dark Code**
Laydown: 24.83
Launch Angle: -3.00°
Break Point: 40.75'
Impact Point: 17.23

- R2X surface profile blends the line between Storm's NRG™ and R2S™ formulas
- The Nova is extremely versatile and handles multiple conditions and surfaces with ease
- The large Ignition Core has a very strong PSA that enhances motion at the breakpoint
- Both balls had a tight spin which provided ample forgiveness

Nova™ vs Dark Code™

Pattern: KK-Middle Road
