

SPECTRE™

HAUNT THE COMPETITION

There is a certain level of expectation that comes with drilling up a new Storm bowling ball. You expect it to have rich, vibrant colors and a pleasant fragrance. You expect it to ignore the heads which often gets worn and dry, especially late in the day. You expect it to turn the corner and charge aggressively through the pocket. You expect it to carry the corner pins, and everything else for that matter. But if you think your expectations are high, you should see ours. Know that each Storm bowling ball is a result from decades of smart design and continuous innovation. From the moment you drill up a Storm ball, you are sure to feel the power inside.

TECHNICAL DATA

R3S™ Pearl Reactive

WEIGHT BLOCK

Vector™ Core

FACTORY FINISH

1500-grit Polished

BALL COLOR

Crimson / Iron

FLARE POTENTIAL

Medium-High

FRAGRANCE

Candy Cane Cookie

THINK. CREATE. INNOVATE.

The development of the next installment of the Thunder™ Line franchise was always going to be a tricky balance – long-awaited fan fulfillment versus something genuinely fresh. The 1500-grit polished R3S coverstock gives you the control needed to attack each shot with confidence, knowing that you're going to get just enough skid to push through the front part of the lane cleanly without sacrificing the traction needed to control the midlane and break point. Oh, and let's not forget about the icing on the cake - candy cane cookie - the fragrance that makes the Spectre smell as good as it looks and rolls!

The cutting-edge Vector Core was designed to be used by the most scrutinous competitor. The mid-range RG should appeal to those who are fans of the ever-popular Hy-Road™ and Trend™ series but crave something in between. With roots tracing back to the Incite™, there's extra post-drilled asymmetry built into the Vector Core if the driller chooses to use it, a feature unique to this design of symmetric core. If you don't use a thumb, be sure to utilize the all-new and innovative 2LS™ system for no-thumb players to layout your striking new Spectre.

“The cutting-edge Vector Core was designed to be used by the most scrutinous competitor.”
