

# Trend versus PRO-Motion

## DOPLAR™ TEST

**Trend**  
R2S™ Pearl Reactive  
1500-grit Polished  
Piston™ Core

→ **Trend**  
Laydown: 22.04  
Launch Angle: -2.80°  
Break Point: 42.16'  
Impact Point: 18.29

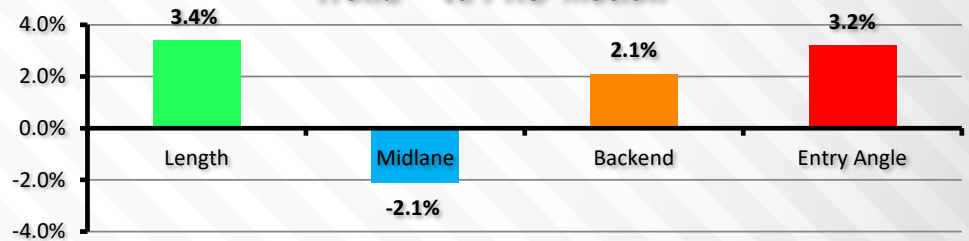

**PRO-Motion**  
SPEC™ Solid Reactive  
2000-grit Abralon®  
Piston™ Core

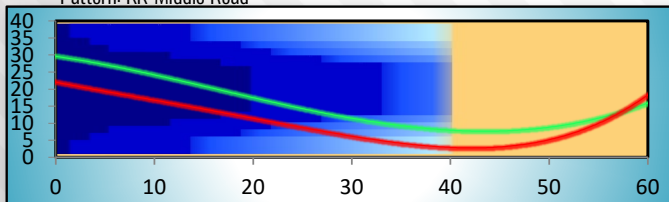

→ **PRO-Motion**  
Laydown: 29.61  
Launch Angle: -3.20°  
Break Point: 43.47'  
Impact Point: 15.91

- The Trend focuses on maximum backend.
- The Piston Core bridges the gap between the Master™ and Thunder™ lines
- The PRO-Motion is built to handle heavier volumes of oil.
- R2S Pearl remains as Storm's most responsive coverstock to date.

### Trend™ vs PRO-Motion™

Pattern: KK-Middle Road

Tester: Chad McLean  
Delivery: Right Hand Cranker  
Rev Rate: 480 RPM  
Rotation: 45°  
Tilt: 6°
