

Tropical Storm™

Intent

Storm has always been committed to providing you a full line of performance options. The Tropical™ Line is the foundation for the rest of Storm's arsenal of equipment.

With six exciting colors and innovative fragrances, the Tropical Storms are sure to appeal to bowlers of all skill levels.

Design

They all feature a proven Reactor™ reactive coverstock material that glides easily through the heads yet reacts down-lane to provide optimum pin carry.

But the new Tropical Storm isn't just eye candy. The Camber™ Core's inverted light bulb shape has real substance. It provides more predictability and control, it's the perfect complement to the Tropical Line.

The new Black/Cherry's hybrid blend is highly polished just like the others in this series. While it can be sanded to create a stronger reaction, we're sure that you are going to love the factory finish just the same. The remainder of the Tropical Storms are pearlized and designed to provide ample length with their lower porosity. The Tropical Line is dedicated to giving you options, and we are certain you will not be disappointed. That is Storm's dedication to bowlers.

Storm – We are "The Bowler's Company™."
