

IDOL™ Helios

BEHIND THE DESIGN:

Due to the overwhelming popularity of the original IDOL™, and due to the non-stop requests from around the globe to bring it back, we decided create a new and improved version instead.

On the inside you will find the original low RG symmetric Ikon™ Core featured in each IDOL series ball to date. But on the outside, you will find our newest creation in terms of coverstock technology in the all new XtremeTrax™ Solid Reactive Coverstock. We started with the base materials of our MicroTrax™ material and went down a new path in terms of chemistry by adding different chemicals which in turn created "chemical charges" to the nano-particles thus making a material that not only digs in on heavy oil, but also provides more angle and shape down lane than traditional nano materials.
