

RST™ X-3

CORE:

RST™ Core (Roto Star Tour Core): The taller core shape promotes more tumble and length through the front of the lane, while the differentials create above average core torque down lane, making for less deflection through the pins.

COVERSTOCK:

MicroTrax™ Hybrid Reactive – This fully loaded nanoparticle hybrid material provides A LOT earlier traction in oil than our eTrax™ PLUS Pearl material without losing responsiveness to friction down lane.

Factory Finish: 4K - Fast

ENGINEERED FOR:

Medium Oil – Medium/Heavy Oil Conditions

Available Weights: 16lbs – 12lbs
